In these new models it is possible to use rechargeable batteries which make these meters environmentally-friendly. 24 hour continuous measurement is possible (when using eneloop® or dry alkaline batteries).

- Please use the dedicated charger to charged eneloop® batteries.
- When using eneloop batteries, please read the eneloop® battery instruction manual.
- eneloop® is a registered trademark of Panasonic group.

Continuous detailed measurements for one month

This meter can be used to conduct long-term measurements, such as environmental measurements. (If an AC adapter is used)

Duration of recording

NL-52/42

1000 h (approx. one month)

Previous model

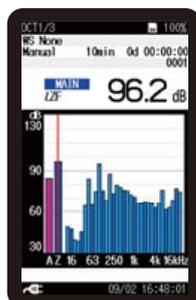

200 h (approx. one week)

Example of detailed recording

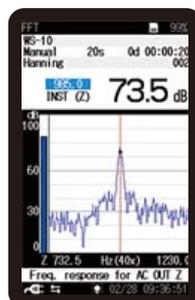

If the L_p is measured at 100 ms intervals and the L_{eq} is simultaneously measured at 10 min intervals over a 24 h period, the total size of accumulated data is approximately 74 MB (reference value)

Functionality can be extended by a range of options

Additional functions can be added, such as simultaneous logging of raw data (100 ms L_p) and processed data (L_{eq} and other indices), frequency analysis reverberation time measurement and long-term data recording.
